WHAT WE TEACH

AI Is Simpler Than You Think

Artificial Intelligence is just a helpful tool — like a smart assistant who's available 24/7. Here's what you need to know:

🤝

It Helps You

AI doesn't replace you. It helps you write, plan, and find answers — like a patient assistant who never gets tired.

🛡️

You're Always Safe

We teach you exactly what to share and what to keep private, so you stay protected every time you use it.

📱

Works on Your Device

Whether you use a phone, tablet, or computer — if you can send a text, you can use AI. Age is no barrier.

🎯

Practical & Real

No tech jargon. No confusing lessons. We focus on things that actually help your daily life — starting Day 1.

> *"If you can send a text message, you can use AI. I'll show you exactly how."*

— Aaron Hartman, AI4Every1

CHOOSE YOUR PATH
